ADD ZEST® TO YOUR PRACTICE

Zocular Eyelid System Technology (ZEST) is a clinically proven procedure to provide dramatic, immediate, and lasting clinical results for your dry eye practice.

ZEST Advantages

DRY EYE — FASTER

MGD — BETTER

DEMODEX — EASIER

* No anesthetic needed
* Natural okra-based treatment
* No Capital equipment required
* Convenient, disposable ZocuKit™
* Superior manual control with customized ZocuSwab™

What is ZEST, or Zocular Eyelid System Treatment?

ZEST is an innovative and effective treatment platform that can only be done with ZocuKit to perform deep eyelid cleansing with surgical precision. ZEST incorporates patented Zokrex™ technology containing natural okra polysaccharide complexes to provide superior treatment result without using any tea tree oil, drugs, or harsh chemicals that can irritate the eye.

Who can perform ZEST?

ZEST is an in-office procedure performed by trained eye care professionals using ZocuKit. It generally takes 7-10 minutes to perform ZEST, and no capital equipment is needed.

When is ZEST utilized?

The eyelid plays an essential role in the complex evolution of dry eye and other ocular surface issues. ZEST empowers you to deliver the care you've always wanted based upon your clinical judgment and evaluation. With ZEST, your hands do indeed provide the healing touch!

Can ZEST be performed with other office-based procedures?

YES. Since most office-based procedures require days to weeks to produce results, ZEST is an indispensable adjunctive procedure to provide immediate and lasting improvements. In combination with at-home therapy with other Zocular products, treatment outcome can be optimized.
